

Padma Gnanapriya

Associate Technical Lead · Senior Software Engineer · React · Node.js · Java · AWS
padmaisuru@gmail.com | +94 76 632 8189 | Galle, Sri Lanka | [linkedin.com/in/padma-gnanapriya](https://www.linkedin.com/in/padma-gnanapriya) | github.com/PadmaGnanapriya

SUMMARY

Senior Full-Stack Software Engineer with 5+ years of experience building enterprise software, including 4.5+ years at Velaris developing enterprise B2B SaaS platforms. Experienced in designing and building scalable, highly available, and cost-efficient distributed systems using React, Node.js, Express, Spring Boot, AWS, and PostgreSQL. Proven track record of re-architecting systems, building event-driven microservices, leading engineering initiatives, mentoring developers, and delivering reliable, production-ready software.

TECHNICAL SKILLS

Languages & Frameworks	JavaScript, TypeScript, Node.js, Express.js, React.js, Redux, Java, Spring Boot, HTML, CSS
Cloud & DevOps	AWS (Lambda, SES, SQS, CloudWatch, EC2, ECS, ECR, RDS, CodePipeline), Serverless Architecture, CI/CD, Docker
Data & Architecture	PostgreSQL, MongoDB, REST APIs, Microservices, Event-Driven Architecture, System Design
Engineering Practices	Performance Optimization, Code Review, Test Automation (Jest), Agile, Mentorship, AI-Assisted Development
Tools	Git / GitHub, Jira, Postman

PROFESSIONAL EXPERIENCE

Associate Technical Lead — [Velaris.io](https://www.velaris.io) Jun 2026 – Present

React · Redux · Node.js · Express · PostgreSQL · AWS · Hybrid, Colombo, Sri Lanka

- **Own platform reliability and observability** — real-time monitoring built on AWS SQS failure-queue analysis, automated Slack alerts, and custom CloudWatch alarms that surface processing failures and delays as they happen.
- **Resolved 500+ data-quality issues** by designing and rolling out a platform-wide event-tracking process.
- **Cut recurring cloud spend across 45 client environments** by deduplicating AWS Secrets Manager calls, trimming CloudWatch log volume, and optimizing core Node.js event handlers to reduce paid third-party API usage.
- **Lead a full-stack React and Node.js/Express squad** across planning, technical direction, and code review, and mentor engineers on architecture and coding standards to drive independent feature ownership.
- **Mentor engineers** on React and Node.js architecture, coding standards, and advanced Git workflows.

Senior Software Engineer — [Velaris.io](https://www.velaris.io) Jun 2024 – Jun 2026

React · Redux · Node.js · Express · PostgreSQL · AWS · Hybrid, Colombo, Sri Lanka

- **Improved throughput 11x and reduced external API calls by 99%** by redesigning the Node.js data-synchronization process, resolving a six-month bottleneck in the legacy system.
- **Re-architected AWS SES email infrastructure for tenant-level isolation** in three days on Node.js Lambda, sustaining 60,000 sends per run with no failures.
- **Delivered enterprise data integrations** (Stripe, Mixpanel, Snowflake) end-to-end across React UIs and Node.js services, using AI-assisted workflows to cut delivery time by 3–4 days per integration.
- **Tripled real-time sync speed in the Intercom integration**, better supporting large enterprise customers.
- **Closed critical findings from external security audits** and completed internal security challenges.
- **Optimized AWS costs by replacing FIFO queues with Standard queues** for event-driven syncs where event processing order is not required.

Software Engineer — [Velaris.io](https://www.velaris.io) Jul 2023 – Jun 2024

React · Redux · Node.js · Express · PostgreSQL · AWS · Hybrid, Colombo, Sri Lanka

- **Built an email analytics dashboard** in React and Chart.js, with metric computation on AWS Lambda, to track engagement and improve deliverability.
- **Implemented Gmail-compliant one-click unsubscribe**, improving sender reputation and delivery performance.
- **Researched and developed the platform's bulk email verification** to mitigate email reputation issues.
- **Reduced infrastructure costs** by migrating core services and event-handler templates to serverless on AWS Lambda.
- **Owned production deployments and releases** — release notes, documentation, and testing.

Associate Software Engineer — [Velaris.io](https://www.velaris.io) Mar 2022 – Jul 2023

React · Redux · Node.js · Express · PostgreSQL · AWS · Hybrid, Colombo, Sri Lanka

- **Built scalable Express.js REST services and PostgreSQL schemas** with optimized tables and indexing, in an Agile team.
- **Built a full-featured marketing email system** powered by AWS SES and React, bypassing Gmail integration constraints and adhering strictly to GDPR compliance standards.
- **Automated QA cases previously considered impossible** with Python and Jupyter test scripts, saving the QA team significant time.
- **Raised code coverage with Jest unit tests** that catch regressions before release.

Software Engineering Trainee — [Intahub \(Pvt\) Ltd](https://www.intahub.com) Sep 2021 – Feb 2022

Angular · Ionic · Express.js · Spring Boot · Colombo, Sri Lanka

- **Built POC systems for cloud and desktop environments** using Angular, Express.js, Spring Boot, and Bootstrap.
- **Developed key features for Intahub's first mobile POS application** using Angular and the Ionic Framework.

EDUCATION

BSc (Hons) Software Engineering — University of Kelaniya, Sri Lanka Second Class Upper Division · GPA 3.54 / 4.0 · Jan 2019 – Aug 2023

React Base - Industrial Training — SoftVessel (Pvt) Ltd Sep 2020 - Feb 2021

Comprehensive Master Java Developer (Professional) — IJSE, Galle Professional Java software engineering diploma
